HOT-Knife L-Bar Sealers

The Quality of Premium Machinery at a Reasonable Price!

L-Bar Sealer Standard Features:

- Permanently Heated TFE Teflon Coated SEAL-HEAD
- Multiple TFE Teflon coated "INSERT" Options
- Seals PVC, Polyethylene and Polyolefin
- TFE Teflon coated Film Clamps
- Dual **MAG-LOK™** Powerful Sealing Magnets
- Proximity Switch for Cycle Activation
- Digital Temp. Controller for Front & Side SEAL-BAR

L-Bar Sealer Standard Features:

- Telescoping Product Deck for **KWIK-ADJUST™**
- Product Disch. Conveyor with soft Start "VARI-SPEED"
- EZ-PERF™** Venting System with **POSI-GUIDES™**
- Heavy Duty Console Stand with Locking Casters & Shelf
- Bumper to prevent Sealer jamming into Shrink Tunnel
- Roller Transition Between Sealer & Tunnel
- Large Head opening for easy insertion of taller Products

BUILT FOR SERIOUS PERFORMANCE

HOT-Knife Sealers

Technical Specifications:

Model No.: HK-1722 L-Bar Sealer
Seal Area: 17" x 22"
Power Requirements: **120 VAC - 16 AMP**
Machine Size: 61L" x 38W" x 56H"
Shipping Weight: 350 LBS

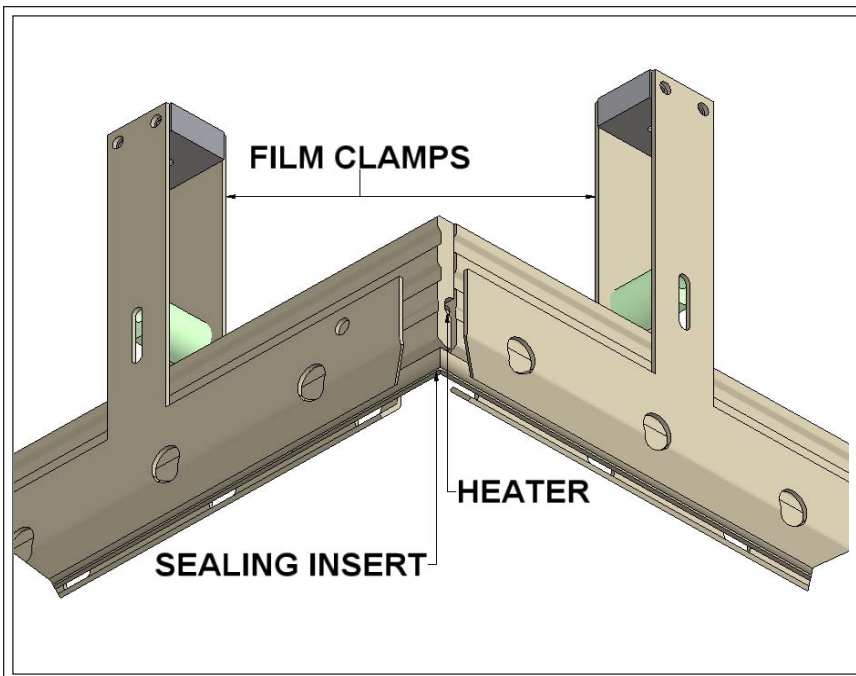

Model No.: HK-2430 L-Bar Sealer
Seal Area: 24" x 30"
Power Requirements: **208/240 VAC - 15 AMP**
Machine Size: 81L" x 44W" x 56H"
Shipping Weight: 450 LBS

□ **SEAL-A-TRON's™ HOT-KNIFE L-Bar Sealers** have been carefully designed for maximum flexibility, accommodating a greater product mix. The Sealers are ideal for cost-conscious users, demanding an industrial strength machine with **TOP-NOTCH** Performance. Standard equipment for this series includes our heavy duty TFE Teflon coated **HOT-Knife**, with multiple insert options.

The most powerful Magnets in the Industry guarantee a very strong seal at lower temperatures, thus allowing longer life of the TFE Coatings on the SEAL-HEAD and Inserts.

Both SEAL-BARS are controlled by separate digital Temperature Controllers, using solid state power switching. This allows absolute temperature control of each SEAL-BAR +/- 2 degrees Fahrenheit.

The Sealers feature an easy use film dispenser with EZ-PERF™ and a high quality soft start discharge conveyor with **POSI-TRAC™** belt tracking. TFE Teflon coated Film Clamps are standard on all **HOT-KNIFE L-Bar Sealers**.

□ **The HOT-Knife SEAL-A-TRON™** is pleased to present the heavy duty **HOT-Knife**. Using a heavy duty Aluminum TFE Teflon coated receiver with multiple coated Insert options. This allows customers to choose Polyolefin or PVC films for retail packages or Polyethylene films can be used for industrial applications as a less expensive alternative.

You always can depend on **SEAL-A-TRON™** equipment for **TOP-NOTCH** Performance.
