Machine Seize: 81L" x 41W" x 56H"
Shipping Weight: 450 LBS

Model No.: SB-3000 Side Bundler
Seal Area: 30"
Power Requirements: **120 VAC - 11 AMP**
Machine Seize: 81L" x 41W" x 56H"
Shipping Weight: 450 LBS

□ **SEAL-A-TRON's™ OCONO™** SERIES L-Bar Sealers have been carefully designed for maximum flexibility, accommodating a greater product mix. This machine is ideal for cost-conscious users who still demand an industrial strength machine. Standard equipment for this series includes our heavy duty Seal Bar extrusion, powerful magnets, and TRU-TEMP™ impulse wire control. The **OCONO™** OS-2030 Sealer also features an easy use film dispenser and high quality discharge conveyor with POSI-TRAC™ belt tracking. Film Clamps and EZ-PERF™ are standard on all **OCONO™** L-Bar Sealers. All these durable features truly set **SEAL-A-TRON™** apart from the competition.

□ **SB-3000**

SEAL-A-TRON™ is pleased to present the Side-Bundler **SB-3000**. This unique machine is built on the heavy duty **OCONO™** 2030 L-Bar Sealer frame. Using the SB-3000, a product can be sleeve wrapped and sent through the Shrink Tunnel length-wise. This allows customers to choose a much narrower less expensive Tunnel. Using PVC films, retail packages can be produced at very little cost. Polyethylene film are even less expensive, and they are mainly used for product protection. This machine is a lot easier to operate than a regular L-Bar Sealer, particular for tall packages. You always can depend on **SEAL-A-TRON™** equipment.

SEAL-A-TRON offers a 1-year warranty on all equipment .
